A256 – ALMONDS, WHOLE, NATURAL, 25 LB

PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> Almonds can be eaten as is, used in recipes, or toasted. TO TOAST: Spread almonds in a single layer on a baking pan and bake at 300-350 °F for 8-10 minutes, stirring occasionally until almonds darken slightly (they will continue to brown slightly when removed from the oven).
USES AND TIPS	<ul style="list-style-type: none"> Natural almonds are good for baking and cooking. Almonds are a tasty and nutritious addition to rice dishes, vegetable dishes, casseroles, stuffings, salads, baked goods, and desserts; they are a wonderful addition to granola; when chopped, they also make an excellent substitute for bread crumbs as a topping for casseroles or as a breading for fish or poultry. Toasted almonds make a good snack.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> Visually inspect for presence of foreign substances, insects, or molds before use.
BEST IF USED BY GUIDANCE	<ul style="list-style-type: none"> For guidance on how to effectively manage, store, and maintain USDA commodities, please visit the FDD Website at: http://www.fns.usda.gov/fdd/facts/biubguidance.htm. A925 – BEANS, GREAT NORTHERN, DRY, WHOLE, 25 LB

PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> Sort dry beans to remove foreign matter, and rinse in cold water. Soaking shortens cooking time and ensures that the beans will hold their shape. Soak dry beans overnight by adding dry beans to cold water. Cover and let stand in refrigerator overnight. Pour off soaking water, rinse, and cook immediately after soaking period. Longer periods of soaking are not recommended. For quick soaking, pour dry beans into boiling water and boil for 2 minutes. Remove from heat and allow to soak for 1 hour. Pour off soaking water, rinse, and cook immediately after soaking period. To cook, use approximately 1¾ qt boiling water for each lb of beans. Optional, add ½ tsp salt for every lb of beans. Cook for 1-2 hours. Add additional boiling water if beans become dry. Drain, if desired.
USES AND TIPS	<ul style="list-style-type: none"> Use cooked dry beans in soups, salads, entrees, or recipes. Serve one variety of beans alone or in combination with others. Cook beans with meats or other vegetables.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> Visually inspect for presence of foreign substances, insects, or mold before use.
BEST IF USED BY GUIDANCE	<ul style="list-style-type: none"> For guidance on how to effectively manage, store, and maintain USDA commodities, please visit the FDD Website at: http://www.fns.usda.gov/fdd/facts/biubguidance.htm. Soaking shortens cooking time and ensures that the beans will hold their shape. Soak dry beans overnight by adding dry beans to cold water. Cover and let stand in refrigerator overnight. Pour off soaking water, rinse, and cook immediately after soaking period. Longer periods of soaking are not recommended. For quick soaking, pour dry beans into boiling water and boil for 2 minutes. Remove from heat and allow to soak for 1 hour. Pour off soaking water, rinse, and cook immediately after soaking period. To cook, use approximately 1¾ qt boiling water for each lb of beans. Optional, add ½ tsp salt for every lb of beans. Cook for 1-2 hours. Add additional boiling water if beans become dry. Drain, if desired.
USES AND TIPS	<ul style="list-style-type: none"> Use cooked dry beans in soups, salads, entrees, or recipes. Serve one variety of beans alone or in combination with others. Cook beans with meats or other vegetables.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> Visually inspect for presence of foreign substances, insects, or mold before use.

A721 – BEEF, CANNED, W/NATURAL JUICES, FULLY COOKED, 24 OZ

USES AND TIPS	<ul style="list-style-type: none"> • Canned beef may be chopped, cubed, ground, sliced, and used in recipes. • Canned beef is thoroughly cooked during processing and may be used in main dishes, such as barbecue beef, pizza, spaghetti sauce and casseroles. Substitute canned, drained beef for cooked ground beef, cooked beef cubes or similar cooked meats in recipes.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> • As long as the can is in good shape, the contents should be safe to eat, although the taste, texture and nutritional value of the food can diminish over time. • NEVER USE food from cans that are leaking, bulging, or are badly dented. • DON'T TASTE canned food with a foul odor, or that spurts liquid from the container when opened.
BEST IF USED BY GUIDANCE	<ul style="list-style-type: none"> • For guidance on how to effectively manage, store, and maintain USDA commodities, please visit the FDD Website at: http://www.fns.usda.gov/fdd/facts/biubguidance.htm. • For additional information on product dating, go to page 6 of <i>Choice Plus Food Safety Supplement</i> at: http://www.nfsmi.org/Information/choice-plus-food-safety-supplement.pdf.

A616 – BEEF, PATTIES, W/SPP, GROUND, RAW, FROZEN, IQF, 40 LB

PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> • Beef patties with SPP should be cooked from the frozen state to prevent moisture loss. Partially thaw in refrigerator only until patties can be easily separated. Separate and place patties on sheet pans. To avoid injury, DO NOT separate with a knife or sharp objects. • Bake in standard oven at 350 °F for 18-20 minutes or convection oven at 350 °F for 6-10 minutes. Cook to an internal temperature of 155 °F for 15 seconds. Judge doneness by temperature, not color or texture of the food. Add seasoning, if desired, after cooking. Serve as soon as possible. Holding beef patties on a steamtable or in a holding cabinet will cause them to dry out and be tough.
USES AND TIPS	<ul style="list-style-type: none"> • Ground beef patties may be baked or broiled in an oven, pan-fried, or pan-broiled. • Beef patties with SPP are excellent in a sandwich or as a main entrée with gravy and mashed potatoes. • For variety, top with low fat cheese, tomato sauce, mushrooms, onions, or other toppings. Season as desired.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> • Thaw frozen products in the refrigerator below fresh or ready-to-eat foods. • Cook ground beef and pork products to 155 °F for 15 seconds. The pink color in safely cooked meat is due to the hemoglobin in tissues which can form a heat-stable color. Smoking or grilling may also cause this reaction. • Keep raw meat and poultry separate from other foods, wash working surfaces (including cutting boards), utensils and hands after touching raw meat or poultry.
BEST IF USED BY GUIDANCE	<ul style="list-style-type: none"> • For guidance on how to effectively manage, store, and maintain USDA commodities, please visit the FDD Website at: http://www.fns.usda.gov/fdd/facts/biubguidance.htm. • For additional information on product dating, go to page 6 of <i>Choice Plus Food Safety Supplement</i> at: http://www.nfsmi.org/Information/choice-plus-food-safety-supplement.pdf.

A752 – CATFISH, STRIPS, BREADED, PARTIALLY-FRIED, FROZEN, IQF

PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> Remove catfish strips from the case and place frozen product on ungreased cookie sheet. Preheat oven to 400 °F. Follow instructions on package label. If instructions are not available, use the following: Bake in conventional oven at 400 °F for 8-9 min OR in a convection oven at 400 °F for 6½-7½ min until an internal temperature of 155 °F is reached for 15 seconds or until fish flakes easily with a fork.
USES AND TIPS	<ul style="list-style-type: none"> Catfish strips may be served as an entrée with tartar sauce, cocktail sauce, or Tabasco sauce. They may also be served on a hoagie bun as a sandwich. Serve on top of a salad or make a catfish fajita by serving it in a tortilla.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> Do not judge doneness by the color or texture of the food. Doneness is when the internal temperature reaches 155 °F for 15 sec.

B030 – CHEESE, AMERICAN, PASTEURIZED, PROCESS, BULK, 40 LB

PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> • Pasteurized process cheese is milder in flavor and softer in body than the natural cheese from which it was made and has good melting properties. • Loaves of cheese can be easily sliced with a clean meat slicer or wire cutter. Process cheese is marginal for shredding, and is not recommended for grinding or grating. Cheese shreds more easily immediately after being removed from refrigeration. Previously frozen process cheese is best used crumbled or shredded. • To lessen crumbling, cut 40 lb block into smaller blocks with a wire cutter instead of a knife. • Cook dishes containing cheese at low temperatures since cheese toughens and gets stringy at high temperatures.
USES AND TIPS	<ul style="list-style-type: none"> • Serve as is with sandwiches, fruit, in cooked dishes such as sauces, casseroles or breads and as a garnish for vegetable or fruit salads.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> • If cheese loaf contains mold, remove a 1 inch section of cheese around and below the mold spot, and recover the cheese in fresh wrap. When removing contaminated cheese, make sure not to touch the mold itself to avoid cross-contamination with other parts of the cheese.
BEST IF USED BY GUIDANCE	<ul style="list-style-type: none"> • For guidance on how to effectively manage, store, and maintain USDA commodities, please visit the FDD Website at: http://www.fns.usda.gov/fdd/facts/biubguidance.htm. • For additional information on product dating, go to page 6 of <i>Choice Plus Food Safety Supplement</i> at: http://www.nfsmi.org/Information/choice-plus-food-safety-supplement.pdf.

CATEGORY	<ul style="list-style-type: none"> Meat/Meat Alternates
PRODUCT DESCRIPTION	<ul style="list-style-type: none"> A pasteurized process blend of natural cheeses. The product can be used as a substitute for pasteurized process cheese and offers a significant reduction in fat when compared to pasteurized process cheese. Pasteurized process cheese is milder in flavor and softer in body than the natural cheese from which it was made and has good melting properties.
PACK/YIELD	<ul style="list-style-type: none"> 6/5 lb loaves per case. One 5 lb loaf AP provides about 80.0 1-oz servings sliced cheese. One lb AP provides about 16.0 1-oz servings sliced cheese. CN Crediting: 1 oz cheese provides 1 oz-equivalent meat/meat alternate.
STORAGE	<ul style="list-style-type: none"> Store cheese in the original container at 41 °F until ready to use. Protect cheeses from mold and dehydration by preventing exposure to air, wrapping tightly with plastic film without air pockets, using new plastic wrap each time opened, placing wrapped cheese in sealed container, and always working in clean area. Use First-In-First-Out (FIFO) storage practices to ensure use of older product first.

B072 – CHEESE, CHEDDAR, YELLOW, BLOCK, 40 LB

PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> To cut cheese, let it warm to room temperature for at least 24 to 36 hours, depending on the size of the block. Permit air to circulate around all sides of each box. Cheese at 70 °F to 80 °F is ready to cut. To lessen crumbling, cut 40-pound blocks into smaller blocks with a wire cutter instead of a knife. Cook all dishes containing cheese at low temperatures since cheese toughens and becomes rubbery and stringy at high temperatures. When used for garnish or flavor, add cheese just before food is removed from the heat.
USES AND TIPS	<ul style="list-style-type: none"> Cheddar cheese can be frozen. There will be changes in body and texture due to moisture crystallization during freezing. For this reason, previously frozen cheese is best used crumbled or shredded. Serve as is with sandwiches, fruit, in cooked dishes such as sauces, combination dishes or breads, or as a garnish for vegetable and fruit salads.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> If a section of cheese contains mold, cut off at least 1 inch around and below the mold spot and recover the cheese in fresh wrap. When trimming off mold, keep the knife out of the mold itself to avoid cross-contamination with other parts of the cheese.

B088 – CHEESE, CHEDDAR, YELLOW, LOAVES, 10 LB

CATEGORY	<ul style="list-style-type: none"> Meat/Meat Alternates
PRODUCT DESCRIPTION	<ul style="list-style-type: none"> Yellow cheddar cheese is a firm-textured, semi-hard, yellow cheese made from cow's milk. A natural cheese, which means that it is prepared and allowed to age or "ripen" to develop the flavor. Flavor can be mild, medium or sharp, depending on the amount of time it is allowed to age. The longer cheddar is aged, the more crumbly it becomes and the better it is for cooking because it does not become stringy when heated. It may be shredded.
PACK/YIELD	<ul style="list-style-type: none"> 4/10 lb loaves per case. One 10 lb loaf AP yields about 40 cups shredded cheese OR about 20 cups cubed cheese and provides about 160.0 1-oz servings cheese. One lb AP yields about 4 cups shredded cheese OR about 2 cups cubed cheese and provides about 16.0 1-oz servings cheese. CN Crediting: 1 oz cheese provides 1 oz-equivalent meat/meat alternate.
STORAGE	<ul style="list-style-type: none"> Store cheese in its original container at 41 °F or lower until needed. If the original wrap is removed, re-wrap cheese tightly with plastic film wrap without air pockets. Once cheese is exposed to air, mold and dehydration may occur. To protect cheese from mold, always work with it in a clean area. Cheese will keep better if re-wrapped with new plastic wrap after each use. To be extra cautious, double-wrap the cheese or place it back in its original container or a sealed dated container. Use First-In-First-Out (FIFO) storage practices to ensure use of older product first.

B020 – CHEESE, MOZZARELLA, LITE, LOAVES, FROZEN, 6 LB

PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> Thaw frozen cheese in the refrigerator for 72 hours at 35 °F (best) to 41 °F (maximum) in its original wrapper to prevent moisture loss. The slower the cheese is thawed, the better. Plan your daily usage to have the correct quantity of cheese in the thawing process. Thawed cheese should be heated for 10 minutes at a temperature of 450 °F in a preheated oven. Heating the product at a higher temperature and/or for a longer period of time may cause the cheese to scorch and brown excessively. If using this product for pizza, it is also beneficial to place any additional toppings over the cheese, rather than placing cheese over the toppings. Check the cheese during use (i.e., at the beginning of the pizza-making process) and if it feels very wet, the product is not completely thawed and must be put back under refrigeration and allowed to complete the thawing process.
USES AND TIPS	<ul style="list-style-type: none"> Lite mozzarella cheese may be eaten as is with fruit, in sandwiches or in cooked dishes such as lasagna and pizza. It may also be used as a garnish for vegetable or fruit salads or other foods.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> If a section of cheese contains mold, cut off at least 1 inch around and below the mold spot, and recover the cheese in fresh wrap. When trimming off mold, keep the knife out of the mold itself to avoid cross-contamination with other parts of the cheese.

B006 – CHEESE, QUESO BLANCO, LOAVES, 4/5 LB

PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> Queso Blanco can be easily crumbled, sliced or shredded. Dishes containing this cheese should be heated at lower temperatures to preserve quality. Queso Blanco has a high melting temperature and will soften but does not melt when heated.
USES AND TIPS	<ul style="list-style-type: none"> Queso Blanco may be eaten as a snack with fruit, but is popularly used in main ethnic dishes such as enchiladas and burritos. It may also be used as a garnish for vegetable or fruit salads or other foods.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> If a section of cheese contains mold, cut off at least 1 inch around and below the mold spot and recover the cheese in fresh wrap. When trimming off mold, keep the knife out of the mold itself to avoid cross-contamination with other parts of the cheese.
BEST IF USED BY GUIDANCE	<ul style="list-style-type: none"> For guidance on how to effectively manage, store, and maintain USDA commodities, please visit the FDD Website at: http://www.fns.usda.gov/fdd/facts/biubguidance.htm. A528 – CHICKEN PATTIES, BURGER-STYLE, FROZEN

CATEGORY	<ul style="list-style-type: none"> Meat/Meat Alternates
PRODUCT DESCRIPTION	<ul style="list-style-type: none"> Frozen fully cooked chicken burgers are made from fully cooked ground chicken with soy protein product (SPP), spices, and seasonings, and shaped into burger-style patties. Each chicken burger-style patty weighs approximately 2.7 oz.
PACK/YIELD	<ul style="list-style-type: none"> 6/5 lb bags per case. One 30 pound case provides about 177.8 2.7-oz patties. One 5-pound bag provides about 29.6 2.7-oz patties. CN Crediting: One 2.7 oz cooked burger-style chicken patty provides 2.0 oz-equivalent meat/meat alternate.
STORAGE	<ul style="list-style-type: none"> Store chicken burger-style patties frozen at 0 °F or below in original shipping case off the floor. Refrigerate leftover chicken burger-style patties covered and labeled in a dated nonmetallic container and use within 2 days. Use First-In-First-Out (FIFO) storage practices to ensure use of older product first.
PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> Frozen chicken burger-style patties should not be thawed before heating. If accidentally thawed, heat immediately and serve. DO NOT REFREEZE. TO COOK: Place frozen chicken burger-style patties in a single layer on sheet pans. In a convection oven heat 8-10 minutes at 375 °F and in a conventional oven heat 10-12 minutes at 400 °F. Cook chicken products to 165 °F for 15 seconds. Judge doneness by temperature, not the color or texture of the food. Serve promptly or refrigerate and use any leftovers within 2 days. Reheat to internal temperature of 165 °F for 15 seconds.

A528 – CHICKEN PATTIES, BURGER-STYLE, FROZEN

USES AND TIPS	<ul style="list-style-type: none"> Chicken burger-style patties are excellent on a sandwich bun or as a center-of-the plate entrée with mashed potatoes and gravy.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> Cook chicken products to an internal temperature of 165 °F for 15 seconds. The pink color in safely cooked chicken is due to the hemoglobin in tissues which can form a heat-stable color. Smoking or grilling may also cause this reaction, which occurs more in young birds. Sanitize cutting boards, utensils, and countertops by using a solution of 1 Tbsp unscented, liquid chlorine bleach in 1 gallon of water.
BEST IF USED BY GUIDANCE	<ul style="list-style-type: none"> For guidance on how to effectively manage, store, and maintain USDA commodities, please visit the FDD Website at: http://www.fns.usda.gov/fdd/facts/biubguidance.htm. A507 – CHICKEN, BONED, FULLY COOKED, CANNED, 50 OZ

PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> • Use a clean cloth to wash the lids of canned foods before opening to keep dirt from getting into the food. • Use a clean and sanitized can opener. • Place canned chicken in refrigerator overnight. Chill only as many cans as will be needed for 1 day's use. Chilling meat in container will permit easier removal of fat from meat. Using a can opener, cut and remove both the bottom and top lids of the can and push the chicken through with the bottom lid. The chicken is best cut across the grain and handled as little as possible to prevent it from becoming stringy. Drain liquid into a separate container for use in recipe or discard if not needed. Use the broth from the chicken for part of the liquid in many main dish and soup recipes.
USES AND TIPS	<ul style="list-style-type: none"> • Use canned boned chicken in main dishes, such as chicken salad, barbecue chicken, and creamed chicken or in chicken noodle soup.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> • As long as the can is in good shape, the contents should be safe to eat, although the taste, texture and nutritional value of the food can diminish over time. • Cook chicken products to an internal temperature of 165 °F for 15 seconds. Judge doneness by temperature, not the color or texture of the food. The pink color in safely cooked chicken is due to the hemoglobin in tissues which can form a heat-stable color. • Sanitize cutting boards, utensils and countertops by using a solution of 1 Tbsp unscented, liquid chlorine bleach in 1 gallon of water. • NEVER USE food from cans that are leaking, bulging, or are badly dented. • DON'T TASTE canned food with a foul odor, or that spurts liquid from the container when opened.
BEST IF USED BY GUIDANCE	<ul style="list-style-type: none"> • For guidance on how to effectively manage, store, and maintain USDA commodities, please visit the FDD Website at: http://www.fns.usda.gov/fdd/facts/biubguidance.htm. • For additional information on product dating, go to page 6 of <i>Choice Plus Food Safety Supplement</i> at: http://www.nfsmi.org/Information/choice-plus-food-safety-supplement.pdf.

Judge doneness by temperature, not the color or texture of the food. • Serve promptly or refrigerate and use any leftovers within 2 days. Reheat to internal temperature of 165 °F for 15 seconds.
USES AND TIPS	<ul style="list-style-type: none"> • Chicken may be baked or oven-fried, broiled, barbecued, or simmered.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> • Thaw frozen products in the refrigerator below fresh or ready-to-eat foods. • Cook chicken products to an internal temperature of 165 °F for 15 seconds. The pink color in safely cooked chicken is due to the hemoglobin in tissues which can form a heat-stable color. Smoking or grilling may also cause this reaction, which occurs more in young birds. • Keep meat and poultry separate from other foods, wash working surfaces (including cutting boards), utensils and hands after touching meat or poultry. • Sanitize cutting boards, utensils and countertops by using a solution of 1 Tbsp unscented, liquid chlorine bleach in 1 gallon of water.
BEST IF USED BY GUIDANCE	<ul style="list-style-type: none"> • For guidance on how to effectively manage, store, and maintain USDA commodities, please visit the FDD Website at: http://www.fns.usda.gov/fdd/facts/biubguidance.htm. • For additional information on product dating, go to page 6 of <i>Choice Plus Food Safety Supplement</i> at: http://www.nfsmi.org/Information/choice-plus-food-safety-supplement.pdf.

A722 – PORK, CANNED, W/NATURAL JUICES, FULLY COOKED, 24 OZ

PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> • Use a clean cloth to wash the lids of canned foods before opening to keep dirt from getting into the food. • Use a clean and sanitized can opener. • Chill canned pork overnight for easy removal of fat and/or slicing. Use natural juices as part of the liquid required by any recipe. Chill only as many cans needed for one day. Using a can opener, remove both the bottom and top lids of the can and push the pork through with the bottom lid. • Heat processed ready-to-eat beef and pork products to 165 °F for 15 seconds.
USES AND TIPS	<ul style="list-style-type: none"> • Canned pork is thoroughly cooked during processing and may be used in main dishes, such as barbecue pork, pizza, soups, stews, spaghetti sauce, vegetable stir-fry, casseroles and similar items. Substitute canned, drained pork for cooked ground pork, cooked pork cubes or similar cooked meats in recipes.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> • As long as the can is in good shape, the contents should be safe to eat, although the taste, texture and nutritional value of the food can diminish over time. • NEVER USE food from cans that are leaking, bulging, or are badly dented. • DO NOT TASTE canned food with a foul odor, or that spurts liquid from the container when opened.
BEST IF USED BY GUIDANCE	<ul style="list-style-type: none"> • For guidance on how to effectively manage, store, and maintain USDA commodities, please visit the FDD Website at: http://www.fns.usda.gov/fdd/facts/biubguidance.htm. • For additional information on product dating, go to page 6 of <i>Choice Plus Food Safety Supplement</i> at: http://www.nfsmi.org/Information/choice-plus-food-safety-supplement.pdf.

A548 – TURKEY HAM, WATER ADDED, FULLY COOKED, FROZEN, 40 LB

PREPARATION/ COOKING INSTRUCTIONS (cont'd)	<ul style="list-style-type: none"> TO HEAT: Remove bag or casing. Place hams, thawed or frozen, in pan and cover. If frozen, cook in a deck oven for 3½-4 hours or in a convection oven for 3-3½ hours at 325 °F. If thawed, cook in a deck or convection oven for 75-90 minutes at 325 °F. Cook turkey products to an internal temperature of 165 °F for 15 seconds. Judge doneness by temperature, not the color or texture of the food.
USES AND TIPS	<ul style="list-style-type: none"> Use sliced, diced, and chopped for sandwiches, salads, casseroles, and entree items.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> Thaw frozen products in the refrigerator below fresh or ready-to-eat foods. Reheat cooked turkey ham to an internal temperature of 165 °F for 15 seconds. The pink color in safely cooked turkey is due to hemoglobin in tissues which can form a heat stable color. Smoking or grilling may also cause this reaction, which occurs more in young turkeys. Keep meat and poultry separate from other foods, wash working surfaces (including cutting boards), utensils and hands after touching meat or poultry. Sanitize cutting boards, utensils and countertops by using a solution of 1 Tbsp unscented, liquid chlorine bleach in 1 gallon of water.

A541 – TURKEY, BURGER, RAW, FROZEN, 36 LB

PREPARATION/ COOKING INSTRUCTIONS (cont'd)	<ul style="list-style-type: none"> • Serve as soon as possible. Holding on a steam table or in a holding cabinet will cause burgers to dry and toughen. Hold on a heat-maintained serving line at a temperature of at least 135 °F for no longer than 2 hours. • Serve promptly or refrigerate and use any leftovers within 2 days. If reheating turkey burgers, reheat to an internal temperature of 165 °F for 15 seconds.
USES AND TIPS	<ul style="list-style-type: none"> • Use for sandwiches and main dishes for lunch.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> • Thaw frozen products in the refrigerator below fresh or ready-to-eat foods. • Keep raw meat and poultry separate from other foods. After touching or cutting raw meats and poultry, wash working surfaces (countertops and cutting boards), utensils and hands with hot, soapy water. • Sanitize cutting boards, utensils and countertops by using a solution of 1 Tbsp unscented, liquid chlorine bleach in 1 gallon of water. • Cook turkey products to an internal temperature of 165 °F for 15 seconds. The pink color in safely cooked turkey is due to hemoglobin in tissues which can form a heat stable color. Smoking or grilling may also cause this reaction, which occurs more in young turkeys.
BEST IF USED BY GUIDANCE	<ul style="list-style-type: none"> • For guidance on how to effectively manage, store, and maintain USDA commodities, please visit the FDD Website at: http://www.fns.usda.gov/fdd/facts/biubguidance.htm. • For additional information on product dating, go to page 6 of <i>Choice Plus Food Safety Supplement</i> at: http://www.nfsmi.org/Information/choice-plus-food-safety-supplement.pdf.

A537 – TURKEY, ROASTS, BONELESS, READY TO COOK, FROZEN, 8-12 LB

Nutrition Information

Turkey roast, boneless, light and dark meat, roasted

CATEGORY	<ul style="list-style-type: none"> Meat/Meat Alternates
PRODUCT DESCRIPTION	<ul style="list-style-type: none"> U.S. Grade A frozen roasts prepared from breast meat, thigh meat and skin of young ready-to-cook turkeys with water, salt, and sodium phosphates added. Roasts are at least 47% breast meat, with a maximum of 34% thigh meat and 12.5% skin. The roasts in one container will not vary more than 2 lb per roast. Each roast will be 9 to 17 inch in length and 4 to 7 inch in diameter and will be tied or placed in cotton netting.
PACK/YIELD	<ul style="list-style-type: none"> 4/8-12 lb roasts per case. One lb AP yields 0.66 lb cooked turkey with skin and provides about 10.5 1-oz servings cooked turkey. CN Crediting: 1 oz cooked turkey provides 1 oz-equivalent meat/meat alternate.
STORAGE	<ul style="list-style-type: none"> Store frozen turkey products in original shipping container off the floor at 0 °F or below. Use First-In-First-Out (FIFO) storage practices to ensure use of older product first.
PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> Sort roasts by weight and diameter to facilitate thawing and/or cooking. Roasts may be cooked frozen or thawed. When cooked from the frozen state, the roasts may be more difficult to slice; allow roasts to stand 15 minutes, after roasting, to firm-up, before removing netting and slicing. TO THAW: Thaw only the amount needed for one day's use in netting in refrigerator for 24 hours. Place in single layers on sheet pans or trays and space on shelves so that air can circulate around wrapped poultry.

A257 – WALNUTS, SHELLED, 30 LB

PREPARATION/ COOKING INSTRUCTIONS	<ul style="list-style-type: none"> Walnuts may be used as is or toasted. TO TOAST: Spread walnuts evenly in a shallow pan and bake at 350 °F, stirring several times, for 12 to 15 minutes or until golden brown. Cool.
USES AND TIPS	<ul style="list-style-type: none"> Use walnuts in salads, fillings, spreads, quick breads, other baked items, casseroles and desserts. Also use walnuts in recipes calling for peanuts or a bread crumb topping. Mix walnuts with sliced fruits or sprinkle them on cottage cheese. Add chopped walnuts to sandwich fillings such as egg, ham, chicken, or tuna salad. Add to cake batter and sprinkle on frosting. Sprinkle on puddings, ice cream or cobblers. Toasting keeps walnuts crisp and crunchy when used in moist mixtures such as sauces, puddings or gelatin salads.
FOOD SAFETY INFORMATION	<ul style="list-style-type: none"> Visually inspect for presence of foreign substances, insects, or molds before use.
BEST IF USED BY GUIDANCE	<ul style="list-style-type: none"> For guidance on how to effectively manage, store, and maintain USDA commodities, please visit the FDD Website at: http://www.fns.usda.gov/fdd/facts/biubguidance.htm.
